

Swiss QR-bill

The **Swiss QR-bill** is designed as a replacement for the payment slips currently used for financial transactions in Switzerland. It has a standardized text layout and contains a digitally readable QR-based barcode that holds all the data for a particular payment, streamlining the processing of bills and credit transfers for companies, government bodies, non-profits and consumers.

The examples below demonstrate different scenarios for the Swiss QR-bill usage. They contain data obtained from the [Swiss QR Bill](#) website and their purpose is to serve both as a showcase and template for a production-ready reports.
